Professional Summary

Software engineer with a strong background in JavaScript, SQL, Sequelize, and Express for backend development, as well as ReactJS and Redux for frontend development. Proficient in Python and Flask with SQLAlchemy for building scalable web applications. Over ten years of management and leadership experience in the solar and manufacturing industries, with a proven track record in project management, team supervision, and quality assurance.

Technical Skills

- **Programming Languages:** JavaScript, Python
 - **Backend:** Node.js, Express, Sequelize, SQLite, SQLAlchemy, Flask
 - **Frontend:** ReactJS, Redux, HTML, CSS
 - **Tools & Technologies:** Git, Docker, REST APIs
 - **Databases:** SQL, SQLite
 - **Other:** Leadership, Project Management, Quality Assurance
-

Projects

No Worries: <https://capstone-noworries.onrender.com/>

A social networking site designed to help seniors connect and find help in their area. React and Redux for frontend. Python and Flask for backend. It also utilizes google maps APIs (javascript, Places and geocoding).

Melody: <https://melody-63tg.onrender.com/>

A music app using React and Redux for frontend and Python and Flask for the backend. It also utilizes AWS for picture and music file storage and wavesurfer to play music on the site.

Holiday Havens: <https://api-project-b8s6.onrender.com>

Air-BnB clone, which uses React and Redux for frontend and Express and Sequelize for the backend.

Professional Experience

Foreman for Main Panel Upgrades & Crew Lead for Solar Installations

Semper Solaris & Stellar Solar

August 2021 – February 2023

- Ensured all completed jobs complied with national electric code and jurisdictional requirements.
- Planned new residential electric systems with homeowners and SDGE.
- Installed new main panels for same-day SDGE disconnects and reconnects.
- Managed crews of 4 or more people for solar and battery installations.
- Experienced in troubleshooting electrical, solar, and battery systems.

Electrical Foreman & Lead Solar Installer

Vivint/Sunrun

October 2018 – August 2021

- Led teams in the installation of solar systems, ensuring compliance with national and local codes.
- Trained and certified to install Enphase home batteries and solar systems.
- Licensed electrician in Illinois (License number: 20132357).
- Managed and trained solar installation crews, fostering high-quality work and safety standards.

Production Manager

Horizon Die Company Inc.

February 2015 – September 2018

- Managed the stamping operation, ensuring quality and timely delivery of products.
- Communicated effectively with Quality, Tooling, and other departments to meet internal and customer requirements.
- Developed and maintained press setup requirements for personnel.
- Responsible for scheduling, training, and documentation of all production personnel.

Senior Level Setup Technician & 2nd Shift Supervisor

Horizon Die Company Inc.

July 2013 – February 2015

- Functioned as Floor Supervisor, Press and Die Setup, Quality Assurance, and Trainer.
- Worked directly with General Manager, Production Manager, Quality Systems Manager, and HR.
- Trained operators and setup technicians, maintaining efficient workflow and quality standards.

Education

Bachelor of Science in Kinesiology

Western Illinois University

Graduated 2009

- Emphasis in Exercise Science
- Minor in Management
- Certification in Supervisory and Leadership

App Academy

Online June – January 24th 2025

Full time software engineering boot camp with emphasis on web development.
