

Full-stack software engineer with expertise in JavaScript/TypeScript ecosystems and modern web technologies, including Next.js and headless CMS systems. Combines recent frontend development experience with 10+ years of leadership background in solar and manufacturing industries, delivering both technical excellence and proven project management capabilities.

Technical Skills: JavaScript | TypeScript | Python | Flask | React | Redux | Next.js | Sanity.io | Express | SQLAlchemy | Sequelize | Docker | HTML | CSS

Relevant Skills: | Project Management | Client Management | Quality Assurance | Content Management System | Responsive Design

WORK EXPERIENCE

Mbolden Change | Web Developer | Remote | Mbolden Change Website

April 2025 – Present

- Developed responsive web components using Next.js 15, React 19, and TypeScript, focusing on modular design and reusability.
- Implemented comprehensive CMS integration using Sanity.io, creating customizable content blocks with advanced validation.
- Built dynamic media handling system supporting multiple aspect ratios and Google Drive video embedding.
- Engineered interactive card components with TypeScript interfaces ensuring full-stack type safety.
- Collaborated with the business owner/founder to translate their vision into functional requirements, managing communication through JIRA.

Stellar Solar, Semper Solaris and Sunrun | Electrical Foreman | San Diego, CA and Chicago, IL **October 2018 – February 2023**

- Led multiple installation teams (5+ technicians) for solar PV, battery, and 400A panel upgrades.
- Maintained zero safety incidents through OSHA compliance and safety protocols.
- Managed quality control processes ensuring all installations met or exceeded NEC Article 690 requirements for photovoltaic systems and energy storage.
- Achieved 95%+ customer satisfaction rating through effective project coordination, clear communication, and meticulous attention to technical detail.

Horizon Die Inc. | Production Manager | East Dundee, IL

Jan 2013 – October 2018

- Led precision metal stamping operations across two shifts (20+ employees).
- Implemented lean manufacturing principles and comprehensive training programs.
- Collaborated with executive leadership to optimize quality standards and customer satisfaction.

PROJECT EXPERIENCE

No Worries | Full-Stack Community Assistance Platform

JavaScript | Python | Flask | SQLAlchemy | React | Redux | GoogleMaps API | Docker | HTML | CSS [GitHub](#) \ [Live](#)

- Built full-stack platform using Flask/React/Redux, integrating Google Maps API for location-based services.
- Implemented Redux state management and Context API for locations/modals with pure functional components.
- Developed Flask/SQLAlchemy backend with comprehensive user/request models and secure authentication.
- Created interactive mapping system with custom markers and real-time location updates.

Melody | Music Streaming Platform

JavaScript | Python | Flask | React | Wavesurfer.js | SQLAlchemy | Redux | Docker | AWS S3 | HTML | CSS | Git [GitHub](#) \ [Live](#)

- Collaborated with team on streaming platform using Flask/React stack with AWS S3 media storage with.
- Built responsive UI with real-time audio controls using React hooks and WaveSurfer.js.
- Implemented secure user authentication and comprehensive error handling.

EDUCATION

App Academy \ Full Stack Web Development

Completed 01/2025

Western Illinois University \ **Bachelors of Science** | Macomb, IL

2009
